The railroad reports for the most part were excellent. Atchison's De-cember report was good as to the matter of gross earnings, but showed a decided decrease in the matter of net. This, however, did not weaken the stock to any appreciable extent, as it was semi-officially announced that the earnings for January would be a record-

London sold on balance between 12,000 and 15,000 shares. London bought a lit-tle Atchison and Philadelphia houses sent in large orders for this stock. The purchases for Philadelphia accounts footed up about 10,000 shares.

A Philadelphia despatch announced that the negotiations for a settlement of the Gould-Pennsylvania troubles had been held up for a short time, but that influential interests are still at work to bring the parties together and that an official announcement of peace can be expected at any time. It was semiofficially announced that the earnings of Pennsylvania would be, above all charges and dividends, at least \$12,000,-000 for the year 1903. The stock was strong on this report and the Gould issues also showed some strength.

Amsterdam sold quite a little Rock Island early in the day. The Chicago crowd had to take a little more stock from that quarter than they really wanted to. This selling was natural, as the Amsterdam bankers were induced to take quite a block of the stock on the promise that it would be placed on a dividend paying basis in terness in Amsterdam over the failure of the management of the company to carry out its promises.

Hocking Coal & Iron advanced on dividends advanced 2 points. In the final dealings there was a renewal of buying and Atchison advanced sharply, making a gain of 3-4 of a point, and other issues followed suit. The market was still dull, but showed some strength and there was a general feeling of hopefulness among the bulls and the traders were inclined to go long of the market on the prospect of a rise.
